For Immediate Release

\$110,000.00 ARC Grant awarded for the necessary Sanitary Sewer Line replacement and extension project at the Youngstown-Warren Regional Airport.

Vienna, OH. May 21, 2014:

Dan Dickten, Aviation Director at the Youngstown-Warren Regional Airport along with Kevin Kern, WRPA Special Projects thankfully receive the ARC Award (from the Appalachian Regional Commission) in the amount of \$110,000.00. Presenting this check were Kathy Zook, the Program Manager at Eastgate, along with Jason Wilson, the Director of the Development Services Agency with the Governor's Office of Appalachia.

This Grant will help with the much needed replacement and extension of the Sanitary Sewer line at the Youngstown-Warren Regional Airport.

The replacement and extension of the sanitary sewer line is necessary to provide an acceptable environment and improve the operational efficiencies of the Airport and it's tenant's existing facilities.

This project is vital considering planned expansion projects at the airport - and will support future growth and development in the region.

The Airport's sanitary sewer line, installed in the late 1940's is failing and is beyond its useful life. Recurrent sewer line breakage and a significant quantity of infiltration are evident with occasional back-ups and damage to facilities.
